ORIGINAL ARTICLES

EPIDEMIOLOGY, CLINICAL PRACTICE AND HEALTH

- Associations between housing and psychological damage by earthquake and modifiable risk factors for dementia in general older adults: Tohoku Medical Megabank community-based cohort study
I Chiba et al. 509
- Association between advanced glycation end-products and fall risk in older adults: The Yakumo Study
H Iida et al. 517
- Nutritional and inflammation factors associated with current frailty level and effect of co-morbidities on the progression of frailty
T Urano et al. 523
- Usefulness of the serum creatinine/cystatin C ratio as a blood biomarker for sarcopenia components among age groups in community-dwelling older people: The SONIC study
W Fang et al. 529
- Association between sleep traits and sarcopenia-related traits: A two-sample bidirectional Mendelian randomization study
R Ye et al. 537
- DASC-21 score and the risk of in-hospital death in elderly patients with heart failure
R Shimizu et al. 546
- Effect of cholecalciferol supplementation on hand grip strength, walking speed, and expression of vitamin D receptor, interleukin-6, and insulin-like growth factor-1 in monocyte in pre-frail older adults: A randomized double-blind placebo-controlled trial
N Dwimartutie et al. 554
- Changes in physical activity during the year after the Great East Japan Earthquake and future frailty in older survivors
M Tsubota-Utsugi et al. 563
- Procalcitonin, brain natriuretic peptide and albumin as markers to predict prognosis in hospitalized older Japanese patients with a risk of infection
T Higashikawa et al. 571
- Care trajectories around a first dementia diagnosis in patients with serious mental illness
I Dufour et al. 577
- Monitoring anti-Xa levels in elderly medical patients undergoing thromboprophylaxis: A prospective cohort study
A Papazachariou et al. 587
- Machine-learning classifier models for predicting sarcopenia in the elderly based on physical factors
J-h Kim 595
- Serum branched-chain amino acid levels are associated with fracture risk in Japanese women
T Urano et al. 603

BEHAVIORAL AND SOCIAL SCIENCES

- Social participation in the neighborhood community prevents onset of disability in community-dwelling older adults whose life space with activities is limited: A 2-year prospective cohort study
K Fujii et al. 609

SOCIAL RESEARCH, PLANNING AND PRACTICE

- Validation of the Delirium Observation Screening Scale in long-term care facilities in Flanders
K Sabbe et al. 619
- Oral frailty, appetite and dietary variety in late-stage older adults: A cross-sectional study (the SStudy of lAte-stage oldeR adulTs in Tottori; START Tottori)
S Nakagawa et al. 626

BIOLOGY

- Are higher protein intake and distribution of protein intake related to higher appendicular muscle mass among an older Japanese population?: A cross-sectional analysis of the National Health and Nutrition Survey 2017
K Ishikawa-Takata et al. 634
- Clinical characteristics of older patients with suspected or diagnosed dementia during hospitalization
H Yoshino and H Takechi 641

LETTERS TO THE EDITOR RESEARCH STUDIES

- Association of marital relationship with quality of life among older adults with mild cognitive impairment and mild dementia
C Fujisawa et al. 646
- Examining the cross-validity of 12 frailty-related items within the Health Assessment Questionnaire for Older Adults: Insights from annual health checkups in Japan
T Ishizaki et al. 647
- Effectiveness of Home Exercise Program for Older People approach for frailty: A preliminary study
K Kawamura et al. 649

COMMENTS

- Which came first: Sarcopenia or weight loss?
K Ohori et al. 652
- Comments on "Association between subjective physical function and occurrence of new fractures in older adults: A retrospective cohort study"
S Togashi et al. 653

CORRECTION

- Correction to "Prolonged grief, reconstruction of meaning, and posttraumatic growth in nursing home residents who have lost loved ones" 655
